Between 1500 and 1630 on 6 September 1954, one Token-type radar set, one antenna mast with cone-shaped bracings and one Dumbo-type radar set were observed 1,650 meters northeast of the southern church at Stegersbach, at triangulation point 332, west of the road leading toward the northeast. Three van-like trucks were parked near the Dumbo-type set. There was a garage shed for about five motor vehicles next to the radar sets. During the reported period, the radar sets were not seen in motion. Eleven soldiers wearing red-bordered black epaulets marched from the installations in the direction of Stegersbach, the main school of which was used as Soviet quarters.
